

Globe Tracking

with Novawall®

ASTM E-2573

Many State agencies and local Code Officials are adopting the 2009 IBC and 2009 IFC. ASTM E-2573 is identified in Section 803.9. ASTM E-2573 requires all Site Fabricated Stretch Fabric Systems to be fire tested using a longitudinal midseam. All Novawall systems fire tests are tested with the actual 1/2", 7/8" and 1" thick midwalls. Check with your local code officials.

FIRE and MATERIALS 2011 CONFERENCE

San Francisco

January 31—February 2

REUSE /RECYCLE

Make 2011 the year to implement a Recycling Program. Start small, be reasonable and soon it will be a habit. Many metropolitan areas have implemented business recycling requirements to reduce demand on landfills. The Vinyl Institute has a database on their website for PVC and Plastic recyclers. You can search by State and click on R i g i d P V C . www.vinylindesign.com

Scrap Novawall track can be recycled and reused as regrind in many products from flooring to auto parts.

**"Track it back to
Something New"**

Congregation Kol Shofar

Cahill Contractors, Inc.

Congregation Kol Shofar named one of California Construction's "Best of 2010"

An expansion and renovation is always a big challenge for design. Incorporating existing elements into a new construction and maintaining a seamless continuity between the old and new, becomes the art.

On the Kol Shofar project the challenge began with the existing radial design of the sanctuary dome. The 20 foot high dome ceiling was divided by 20 redwood spokes. This required some thought about removal of the old ceiling, adding a number of new penetrations and making the spokes and concentric details coexist within such a large curved finish.

Mike Van Bommel of Ireland Interiors, aka **Novawall Northern California** in San Francisco, was able to show the team what could be done with **Novawall's 1" Concealed Edge track**. This was not their first time to face such an expansive ceiling. Ireland Interiors recently completed a beautiful installation of **Novaspan** on the complex beamed ceiling of the Brazilian Room in historic Tilden Park .

Using the Concealed Edge track, mounted on it's side, curving it around large skylights and aligning the installation down the long redwood spokes, the track flushed out perfectly with other trades and finishes. All of the hard work and intricate detailing by Ireland Interiors crew cannot be fully appreciated until standing in the finished sanctuary looking upward in awe.

The project was named a Winner in the "**10 Best of California 2010**" by California Construction Magazine. It is certainly a Winner and a great success for **Ireland Interiors** and for **Novawall Systems, Inc.**
